

ZAIN UL ABIDIN

Software Engineer

Islamabad, Pakistan | +92 333 5771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhozayn | zayyn.tech

SUMMARY

Software Engineer with hands-on experience building full-stack web applications using TypeScript, JavaScript, React, Next.js, Node.js, and Express.js. Experienced in developing REST APIs, integrating databases and third-party services, implementing authentication and security, and deploying production applications with Docker, Git, CI/CD, and modern cloud platforms. Strong foundation in data structures, algorithms, databases, operating systems, and software engineering.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript
Frontend	React, Next.js, Redux Toolkit, Zustand, Context API, TanStack Query, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, GraphQL, Socket.io, BullMQ
Databases	PostgreSQL, MongoDB, MySQL, Redis
Authentication	JWT, OAuth, RBAC, bcrypt, Rate Limiting, API Security
DevOps & Cloud	Docker, CI/CD, Linux, Vercel, Render
Tools	Git, GitHub, Postman, VS Code, Chrome DevTools, CLI
Integrations	Stripe Payments, Third-Party APIs

EXPERIENCE

Full Stack Engineer <i>Foundrium</i>	May 2026 – Present <i>Hybrid</i>
- Build and maintain full-stack web applications using React, Next.js, Node.js, and modern JavaScript/TypeScript tooling. - Develop RESTful APIs and backend services with Node.js, implementing secure data flows between frontend applications and databases. - Design reusable, component-driven interfaces and integrate frontend applications with backend services and third-party APIs. - Contribute across the software development lifecycle, including feature development, debugging, testing, deployment, and maintenance.	
Freelance Software Engineer <i>Upwork</i>	Aug 2024 – Present <i>Remote</i>
- Develop and deploy custom web applications using React, Next.js, Node.js, and database technologies based on client requirements. - Manage projects from requirements gathering and implementation through deployment, bug fixing, integrations, and ongoing maintenance. - Build responsive user interfaces and backend services with a focus on maintainability, performance, and reliable user experiences.	

PROJECTS

Picket: Automated Candidate Verification Platform <i>Live</i> <i>GitHub</i>	Apr 2026 – Jun 2026
- Built an AI-powered hiring platform that screens resumes and verifies candidate profiles to streamline candidate evaluation workflows. - Implemented automated checks for AI-generated resumes and bot applications while designing the system to process large candidate datasets efficiently.	

- Developed the application using modern full-stack web technologies with a focus on scalable backend processing and responsive user interfaces.

Attestify: Decentralized Credential Verification | *Live* | *GitHub*

Oct 2024 – Jan 2025

- Built a credential verification platform that enables organizations to issue digital certificates with QR-based authenticity verification.
- Implemented secure document workflows and automated verification to reduce manual certificate validation and improve reliability.

Homivio: E-Commerce Storefront | *Live* | *GitHub*

Jun 2024 – Aug 2024

- Developed a responsive e-commerce storefront with product browsing, shopping cart functionality, Stripe payments, and an administrative inventory dashboard.
- Implemented optimized frontend components and backend integrations to provide a fast and reliable shopping experience across desktop and mobile devices.

AutoMailer: AI Job Application & Resume Customizer | *Live* | *GitHub*

2026

- Built an AI-powered job application tool that extracts requirements from job postings and generates tailored resume content.
- Developed automated resume generation and recruiter outreach workflows, including customized email drafting and application support.

Digestible: AI Short Video Summarizer | *Live* | *GitHub*

2026

- Built an AI-powered web and mobile application that converts short-form videos into concise summaries, timestamps, and actionable takeaways.
- Implemented background processing to analyze video audio and text, allowing users to save, search, and organize generated summaries in a personal library.

EDUCATION

Bachelor of Science in Computer Science

Sep 2022 – Jun 2026

The University of Chakwal

Chakwal, Pakistan

- **CGPA:** 3.41 / 4.00
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence
