

ZAIN UL ABIDIN

Software Engineer

+923335771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhozayn | z4yn.vercel.app

SUMMARY

Highly motivated Computer Science graduate specializing in end-to-end full-stack development. Proficient in crafting responsive frontends with React and Next.js, building robust Node.js backends, and designing efficient database architectures using PostgreSQL and MongoDB. Experienced in streamlining deployment workflows with Docker, CI/CD pipelines, and modern cloud platforms. Eager to contribute clean, scalable code and agile problem-solving to a collaborative engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++
Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, GraphQL, Socket.io, JWT, Microservices
Databases: MongoDB, MySQL, PostgreSQL, Redis
DevOps & Tools: CI/CD, Docker, Git, GitHub, Linux, Postman, Vercel, Render
AI Workflows: Claude Code, Cursor, GitHub Copilot, v0, Antigravity

PROJECTS

Picket: Agentic Candidate Screening Platform

Jan 2026 – May 2026

picket-hr.vercel.app | *GitHub*

- Engineered an end-to-end processing pipeline using Node.js, BullMQ, Redis, and a three-agent AI system, accelerating manual candidate pre-screening tasks to under 5 seconds per applicant.
- Implemented real-time pipeline visibility by pairing background job processing with Socket.io broadcasts, enabling dashboard status updates within 80ms of a screening step's completion.

Attestify: Blockchain-based Academic Credential Infrastructure

Oct 2025 – Mar 2026

attestify-alpha.vercel.app | *GitHub*

- Developed a decentralized credentialing platform with React 19, Node.js, and Ethereum to facilitate the issuance and public verification of tamper-proof academic certificates.
- Integrated non-transferable Soulbound Tokens (ERC-721) and IPFS storage via Pinata, ensuring student records remain permanently accessible and secure against server downtime.

Homivio: Modern Next.js E-commerce Storefront

Feb 2025 – June 2025

homivio-ecom.vercel.app | *GitHub*

- Developed a responsive e-commerce storefront using Next.js 15, React 19, and Tailwind CSS, featuring dynamic product routing and automated SEO metadata generation.
- Implemented a global shopping cart utilizing the React Context API with localStorage persistence, and integrated the Stripe SDK for secure checkout flows.

EDUCATION

The University of Chakwal

Chakwal, Pakistan

Bachelor of Science in Computer Science

2022 – 2026

- CGPA:** 3.43 / 4.00
- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence

PUBLICATIONS

Attestify: A Hybrid Blockchain-IPFS Framework for Credential Verification

June 2026

Published in Spectrum of Engineering Sciences

- Authored a paper proposing a novel decentralized architecture combining non-transferable Soulbound Tokens (SBTs) and dual-anchor document integrity (SHA-256 and IPFS) to reduce academic fraud.
- DOI:** 10.5281/zenodo.20655578 | **Read Paper:** thesesjournal.com
