

ZAIN UL ABIDIN

Software Engineer

Islamabad, Pakistan | +923335771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhozayn | z4yn.vercel.app

SUMMARY

Software Engineer specializing in building scalable, full-stack web applications. Proficient in crafting responsive frontends with React and Next.js, building robust Node.js backends, and designing efficient database architectures using MongoDB and PostgreSQL. Experienced in streamlining deployment workflows with Docker, CI/CD pipelines, and modern cloud platforms.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript, TypeScript, Python, React, Next.js, Node.js, Express.js
State & Frontend Tools	Context API, Redux Toolkit, TanStack Query, Zustand, TailwindCSS
APIs & Integration	REST APIs, GraphQL, Socket.io, BullMQ, Stripe Payments
Databases	MongoDB, MySQL, PostgreSQL, Redis
Identity & Security	JWT, OAuth, Bcrypt, RBAC, Rate Limiting, API Security
Cloud & DevOps	CI/CD, Docker, Linux, Vercel, Render, Git, GitHub
Developer Tools	VS Code, Postman, Chrome DevTools, CLI

EXPERIENCE

Freelance Software Engineer <i>Upwork</i>	May 2024 – Present <i>Remote</i>
- Built and shipped custom web applications using React, Next.js, and Node.js, translating client requirements into scalable solutions. - Led projects from initial discussions through deployment, managing feature development, integrations, bug fixes, and ongoing support.	

PROJECTS

Picket: Automated Candidate Verification Platform <i>Live</i> <i>GitHub</i>	Apr 2026 – June 2026
- Engineered a React/Node.js hiring platform processing 500+ resumes asynchronously with BullMQ and Redis. - Integrated AI agents for plagiarism detection and enabled live progress tracking via secure Socket.io connections.	
Attestify: Decentralized Credential Verification <i>Live</i> <i>GitHub</i>	Oct 2025 – Jan 2025
- Built a MERN application enabling universities to issue and manage tamper-proof academic credentials. - Implemented role-based dashboards featuring on-chain verification, IPFS storage, and batch PDF generation.	
Homivio: Modern E-Commerce Storefront <i>Live</i> <i>GitHub</i>	Jun 2024 – Aug 2024
- Developed a Next.js e-commerce storefront with dynamic routing, an admin panel, and robust local state. - Integrated Stripe serverless functions for secure checkout and end-to-end purchasing flows.	

EDUCATION

Bachelor of Science in Computer Science <i>The University of Chakwal</i>	Sep 2022 – Jun 2026 <i>Chakwal, Pakistan</i>
CGPA: 3.41 / 4.00 Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence
