TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Solidity, Python, C++

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, GraphQL

Databases: MongoDB, PostgreSQL

Blockchain: Smart Contracts, Web3.js, Ether.js, Ethereum & Testnets

DevOps & Deployment: Git & Github, Vercel, Netlify, Docker, Github Actions

Tools & Workflow: Linux, Visual Studio Code, Postman, Claude Code, Antigravity, NPM, CLI

PROJECTS

Attestify | A Blockchain-based Academic Credential Infrastructure

Final Year Project | 2026

- Built a decentralized platform for universities to issue tamper-proof digital certificates using blockchain technology and soulbound tokens.
- Designed a full-stack architecture that connects a React frontend with a Node.js backend and Ethereum smart contracts.
- Developed an automated system for generating secure digital documents and storing them permanently on decentralized storage.
- Created a public verification portal that allows anyone to instantly confirm the authenticity of a certificate.
- Built bulk-processing tools to help institutions issue hundreds of digital credentials simultaneously with high reliability.
- Designed a modern, real-time dashboard for students and issuers to manage and track their digital records easily.

EDUCATION

Bachelors of Science, Computer Science

The University of Chakwal | 2026

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence

CGPA: 3.43/4.0

CERTIFICATIONS

Certified React Developer

HackerRank | July, 2025

Web Programming with Python and JavaScript

Harvard CS50 | August, 2025

Blockchain Basics

Cyfrin Updraft | October, 2025
