

ZAIN UL ABIDIN

Software Engineer

+923335771397 | guesswhozayn@gmail.com | linkedin.com/in/z4yn | github.com/guesswhozayn | z4yn.vercel.app

SUMMARY

A software engineer specializing in comprehensive full-stack development. Dedicated to building scalable, user-centric applications through clean code, modern system design, and efficient deployment pipelines.

EDUCATION

The University of Chakwal

Chakwal, Pakistan

Bachelor of Science in Computer Science

2022 – 2026

- **CGPA:** 3.43 / 4.00
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Solidity, Python, C++

Frontend: React, Next.js, Vite, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, RESTful APIs, GraphQL, Socket.io, BullMQ, JWT

Databases: MongoDB, PostgreSQL, Redis

Blockchain: Smart Contracts, Hardhat, Ethers.js, OpenZeppelin Contracts, Ethereum & Testnets

DevOps & Deployment: Git, GitHub, Vercel, Netlify, Docker, Nginx, GitHub Actions

Tools & Workflow: Linux, Visual Studio Code, Postman, NPM, CLI

PROJECTS

Picket | *Agentic Candidate Screening Platform* | picket-hr.vercel.app

Jan 2026 – May 2026

- Designed and built an AI-driven screening process that automatically reviews candidate resumes, verifies their online professional presence, and runs skills tests.
- Created a background processing system to run candidate checks simultaneously without slowing down the web application.
- Developed a feature allowing users to connect their own AI accounts (API keys), with built-in backups to keep the system running if one service fails.
- Built a custom test generator that automatically creates and grades coding and logic puzzles customized for each job description.
- Implemented live updates on the dashboard so hiring managers see the screening progress and results instantly.
- Designed a clean, modern user interface with smooth animations and simple layouts to make the platform easy to navigate.
- Packaged the entire application into containers (Docker) so it can be set up and run on any computer with a single command.
- **Technologies Used:** React, Tailwind CSS, Vite, Node.js, Express.js, MongoDB, Redis, BullMQ, Socket.io, Docker.

Attestify | *Blockchain-based Academic Credential Infrastructure* | attestify-alpha.vercel.app

Oct 2025 – Mar 2026

- Built a decentralized platform for universities to issue tamper-proof digital certificates using blockchain technology and soulbound tokens.
- Designed a full-stack architecture connecting a React frontend with a Node.js backend and Ethereum smart contracts.
- Developed an automated system for generating secure digital documents and storing them permanently on decentralized storage.
- Created a public verification portal allowing anyone to instantly confirm the authenticity of a certificate.
- Built bulk-processing tools to help institutions issue hundreds of digital credentials simultaneously with high reliability.
- Designed a modern, real-time dashboard for students and issuers to manage and track their digital records easily.
- **Technologies Used:** React, Node.js, Express.js, MongoDB, Tailwind CSS, Solidity, Hardhat, Ethers.js, OpenZeppelin Contracts.

PUBLICATIONS

Attestify: A Hybrid Blockchain-IPFS Framework for Credential Verification

June 2026

Published in Spectrum of Engineering Sciences

- Introduced Attestify, a hybrid decentralized system built using Ethereum smart contracts (Solidity), the InterPlanetary File System (IPFS), and non-transferable Soulbound Tokens (SBTs) to address fraudulent credentials.
- Developed the reference implementation using a React frontend and a Node.js/Express backend, and deployed it on the Sepolia testnet of the Ethereum Proof-of-Stake chain.
- Designed a novel architecture that uniquely combines non-transferability, dual-anchor document integrity (SHA-256 digest and IPFS CID), batch issuance, and on-chain revocation in a single open-source platform.
