Experience

Founder & CTO May 2026 – Present

Foundrium *Pakistan*

- Lead end-to-end product development, from ideation and architecture to deployment.
- Architect and build full-stack applications using React, Next.js, TypeScript, and Node.js.
- Design backend services and REST APIs, integrating databases, third-party APIs, and external services.
- Make technical decisions around system scalability, infrastructure, and third-party integrations.

Projects

Picket | React, Node.js, Express, MongoDB, BullMQ, Redis, Socket.io *Live* | *GitHub*

- Filtered fraudulent and exaggerated applicants by automatically verifying candidate claims against public GitHub activity and AI-generated text patterns.
- Reduced recruiter screening time with a live collaborative dashboard for reviewing candidate scores and managing hiring pipelines.

Outlio | Next.js, React, Gemini API, Gmail REST API, Supabase *Live* | *GitHub*

- Reduced application preparation time from hours to seconds by transforming job listing screenshots into customized, ATS-ready resumes.
- Enabled one-click recruiter outreach by generating tailored cold email pitches and sending resume attachments directly through Gmail.

Digestible | React, TypeScript, Node.js, Express, BullMQ, Redis, Supabase *Live* | *GitHub*

- Transformed 60-second video tutorials and reels into 15-second actionable checklists, eliminating the need to repeatedly rewatch or scrub videos.
- Built a background processing pipeline that extracts key takeaways from video links in under 30 seconds.

Attestify | React, Node.js, Express, Ethers.js, IPFS, BullMQ, Redis, MongoDB *Live* | *GitHub*

- Eliminated manual background checks by enabling instant public verification of degrees and certificates through QR code scanning.
- Automated bulk university credential issuance, generating thousands of tamper-proof digital diplomas in minutes from a single CSV upload.
