

ZAIN UL ABIDIN

Software Engineer

+923335771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhoazayn | z4yn.vercel.app

SUMMARY

Software Engineer specializing in building scalable, full-stack web applications. Proficient in crafting responsive frontends with React and Next.js, building robust Node.js backends, and designing efficient database architectures using MongoDB and PostgreSQL. Experienced in streamlining deployment workflows with Docker, CI/CD pipelines, and modern cloud platforms.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript, TypeScript, Python, SQL, C++, React, Next.js, Node.js, Express.js
State & Frontend Tools	Context API, Redux Toolkit, TanStack Query, Zustand, TailwindCSS
APIs & Integration	REST APIs, GraphQL, Socket.io, BullMQ, Stripe Payments
Databases	MongoDB, MySQL, PostgreSQL, Redis
Identity & Security	JWT, OAuth, Role-Based Access Control (RBAC)
Cloud & DevOps	CI/CD, Docker, Linux, Vercel, Render, Git, GitHub
Developer Tools	VS Code, Postman, Chrome DevTools, CLI

RELEVANT EXPERIENCE

Picket: Automated Candidate Verification & Assessment Platform <i>picket-hr.vercel.app github.com/guesswhoazayn/picket</i>	2026
- Built a hiring platform using React, Node.js, Express, and MongoDB processing 500+ resumes asynchronously using BullMQ and Redis, reducing screening time from hours to minutes, uses AI agents for plagiarism detection and digital footprint verification, with real-time status updates via Socket.io. - Designed a React dashboard with server-state caching and protected routing, allowing hiring managers to upload resumes, track live pipeline progress, and manage AI-generated candidate assessments.	
Attestify: Decentralized Credential Verification Platform <i>attestify-alpha.vercel.app github.com/guesswhoazayn/attestify</i>	2025
- Developed a full-stack application using React, Node.js, Express, and MongoDB enabling universities to issue tamper-proof academic credentials, with APIs handling PDF certificate generation, email notifications, IPFS storage, and blockchain-based verification. - Built a React frontend with role-based dashboards for issuers, students, and employers, featuring on-chain credential verification, QR code scanning, and batch certificate issuance workflows.	
Homivio: Modern E-Commerce Storefront <i>homivio-ecom.vercel.app github.com/guesswhoazayn/homivio</i>	2024
- Created a full-stack e-commerce application using Next.js and React with dynamic product routing, an admin panel for inventory management, and a persistent shopping cart powered by React Context and localStorage. - Integrated Stripe payment processing through a serverless function for secure checkout, and built a fully responsive storefront covering product browsing, cart management, and the complete purchase flow.	

EDUCATION

The University of Chakwal <i>Bachelor of Science in Computer Science</i>	2022 – 2026
CGPA: 3.41 / 4.00 Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Engineering, Operating Systems, Software Engineering, Artificial Intelligence	

PUBLICATIONS

Attestify: A Hybrid Blockchain-IPFS Framework for Credential Verification <i>Published in Spectrum of Engineering Sciences</i>	2026
- Authored a paper proposing a novel decentralized architecture combining non-transferable Soulbound Tokens (SBTs) and dual-anchor document integrity (SHA-256 and IPFS) to reduce academic fraud. DOI: 10.5281/zenodo.20655578 Read Paper: thesesjournal.com/index.php/1/article/view/3193
